quagmire-Box: technocratic- Plutocracy[1] does NOT want to end wars

t0 peace-People:

I do not like, but condone these wars...John Pilger on zNet writes <http://www.zcommunications.org/zspace/commentaries/4036>

some details that I find make my morning coffee a cuppo less grief than leaving old faces to hot Sun's u-v or photos that fade, naturally. I like what John relates, because he states what facts are that covet the lies. I do the same with deceits about nuclear-Molecular: all of NSDU-238, by the way! "Since the second world war, the arsenal of freedom has overthrown 50 governments, including democracies, and crushed some 30 liberation movements. Millions of people all over the world have been driven out of their homes and subjected to crippling embargos. *Bombing is as American as apple pie.*" This is one entreaty that I couple with "Whenever you want to end these wars...quagmire 'box'!" my own judgment on the populous of citizenry here that would rather go skiing naked in total abandon for "freedom" yet do not.

The u-S is more than Sparta and the old-Rome is the equation of "propaganda-State" your nation has become irresolute, and your people staid. But his truths speak to me and I'd figure that the whole text is worthy and not swarthy for you—since you do not want to comment on NSDU-238 nor at least rent a parking place for my apartment hunt, which starts next week—by your observed lacking energy attitude. I'll just point a few lines and your can context the remainder, since \$18 billion is being spent each month in your names—i.e. not mine, by the way?

"The Rudd government and the Pentagon have launched a competition to build military robots which, it is said, will do the "army's dirty work" in "urban combat zones". What urban combat zones? What dirty work?" AND, "Shortly before Kevin Rudd made that statement, American planes bombed a wedding party in Afghanistan. At least sixty people were blown to bits, including the bride and groom and many children. That's the fifth wedding party attacked, in our name." Complicity is fun as killing people is fun, so that they cannot subscribe to their own "democracy". AND "What has changed? Quite a lot actually. As people have become more aware, propaganda has become more sophisticated."

The free mind speaks. His mind on war-Correspondence, mine on NSDU-238 subtleties. Mr. Pilger states, ""Although we have stressed the fact publicly that our assistance was given in response to an invitation by the government of South Vietnam, our offer was in fact made following a request from the United States government." Two versions. One for us, one for them." Two versions of wars concurrently in two un-Declared war-Zones picked by the Pentagons and handed to the state-Dept. There are, also, two nuclear-Molecular: fission-Weapons, the first is called NSDU-238, and was invented in 1943, and the second

(now thermo-Nuclear: the super) was invented in 1949. That plutonium was used is merely the case of which box you choose to kill others with. This is important, or you, can complement to "pollution" that the Army is making haste so surreptitiously with, as more troops, more uranium-238 subscription for protecting the double standard.

Pollution is the propaganda "estate" and can be discussed freely, because the cop-Out has been that we-Humans did not need a different fuel in 1974, since Liquid Natural Gas would have been too volatile for industry-Needs and that would have meant millions of workers becoming the availability of "unionizing" to build "1/4 inch round fuel tanks, injecting motors for a vehicular fuel that pollutes 95% "CLEANER" than the abuse of hydro-Carbons, continuing from oil-is-Best lubricant/worst fuel, since then. Propaganda and plutocracy are making more the new-Sparta old Rome "renewed Syndrome" into war-Chaos theory a la Jack Abramhamof, gHW Bushwhacky, Donald Rummy, Dickie Chaingang, Henry-bilt Kissactor, Karl Rovingmadness and the impolite peonage (g-Enron) since NSDU-238's "march-of-Death: massacre" of those hardly monument-Erected yet, killing is so much fun, retreating army of Saddam Insane's Ba'ath Party subverts, conscripts and civilians.

As a parttime journalist, this one tends to concur that John Pilger is worthy of re-reading, not re-writing, since the quagmire-Box was handed to me, I had to look inside. I just wonder as John does ""How many more wars are we to be suckered into before we break our silence?" If one believes that plutocracy is great because the autocratic-Ascendency predicates that Elitism controls the money-Market, stock-Market, Foreclosure-Market, war-Making apparatus thru arms-Sales post production each five years, then how close to both

fascism and communism have they gotten, is hardly the fear. That NSDU-238 is encircling the planet in microns that stay aloft, then what size is kept out by masks on the planet's surface. They're smaller than oxygen atoms, people. John Pilger's article also states "One of the founders of modern propaganda was Edward Bernays, an American who believed that people in free societies could be lied to and regimented without them realising. He invented a euphemism for propaganda – "public relations", or PR. "What matters," he said, "is the illusion." Like Kevin Rudd's stage-managed press conferences outside his church, what matters is the illusion."

The illusion is that defense in aggression, invasion, offense, and parable of tax-Monies well spendt in only killing others, whether those one-Dozen wedding parties or friendly-Bombs as in today's news "five Afghan soldiers, and four police were killed to death" by so-Called N.A.T.O. is good, gracious and helps "propagandize" the populous as they pay. Shame on America's being "the new-Rome". The new-Rome needs to "halt polluting by invasions" as hydro-Carbons amassed, or chem-Trails, in usages hardly covered by EPA regulations, as the rong-Phooels are not liquid-natural-Gas and hydrogen combined, yet, but should be on all big-Rigs delivering pesticide-Foods to your market. War's are great for polluting over-There, as well as for killing others w new 'toys' and old-Pollution. Propaganda is not cool, people. Where's the enforcements? Not cool at all!

Lastly, the shooting 30 hours ago at Fort Hood, that resulted in 13 deaths and 30 casualties—on a military base how else can you express 'murders' are as much a purveyance of illegal "warring" as they are that all is not well where violence is corrupting, that this nation-State has as a cultural sword for propaganda. Does this mean "the new-Rome: syndrome" is

continuing. However, you find resolve for killing “civilians” at weddings, at Mosques, or only providing fodder of capital in-the-pocketbook, the old adage “don’t get involved unless you know where the law is” maintains that “war brings the worst ‘out’ of people”, some non-Elemental times due time-Era obsessives!

gUnS don't cause wars, people do— peace without wars...

end UN-declared-Wars, HALT NSDU-238,

the global-Village patriot

autocracy-Plutocratic: want to end the wars quagmire-Box

Tags/ technocratic-Plutocracy, u-S is more than Sparta, and old-Rome, Bombing, is as American, as apple pie, John Pilger, EPA, enforcements, hydro-Carbons amassed, or chem-Trails, killing civilians, NSDU-238, is not good for planet, nor people

[\[1\]](#) The oligarchic-Elites, military-Hegemonyites, and Technocrats who carry-out the deifice of plutocracy DO NOT want autocratic rulership! Period. See my books for a finer evaluation and political analysis...
