I've gotten thru my cyber-space time-warps, but has tokenism taken over where your brains let off w incriminating "rudeness" and w not-so-passive-Ultra MK Ultra represents, CHEM tRails. I do think human thinking is not all empiricism intrinsic to "Federal reseRve Bank Destroys" Gold or was that merely Trick-Dick disguised as a tory. I believe Nixon did that caper and got caught in a bind that he might have to telltale to the "bad-side rhetoric" that he carried, on and along, not relenting that LBJ may have had JFK killed or that thru manipulations in FBI's the cIAS and (bad-guy) Mob from New Orleans may not suffer jail time? "If the Fukushima saga has taught us anything, it's that government officials routinely downplay and lie about risks in the name of preventing panic. However, this method of treating the general public as infants who should be shielded from the truth even at the cost of their own health has already backfired.

Last month it was revealed that 71 U.S. sailors who helped during the initial Fukushima relief efforts are suing the

Tokyo Electric Power Co. (TEPCO) after they returned with thyroid cancer, Leukemia, and brain tumors as a result of being exposed to radiation at 300 times the safe level.

With the Japanese government and TEPCO having repeatedly been caught lying about the true radiation levels both in the toxic water spilling into the Pacific Ocean and around the plant itself, mass wildlife die offs are already being recorded as radioactive debris hits the west coast."
