

coloRadie high-MTNs (2009) batch #19 [3-10-17]

coloRadie high-MTNs (2009) batch #19 [3-10-17]...

I started studying photography @ 7.5 years, and by age-20 my hikes into Pikes Peak 'reaches' not always w others hit 13 different routes and 16 major days-long climbs (1966 thru 1968). Bears do not love we-People yet do not scare them nor attempt to feed, but take food and water and a bed-roll, etc. What to study of the Ecology and what to photo made for a difficult duality. Yet, I desired the Existentialist of mTNS and that meant Zen, as well as learned dispositions in technical: Camera-ing and visuality.

These 41-years later iMaGeS will be added to my others of slr-35's digitalized for a bigger batch *eventually*. My geomorphics: coloRadie, U-T-tah, and Nevada (califoRnia has been stolen/lost) have garnered lots more than one: over-niteR w fReezing in mind!

The public-Display is far different than the finished 'pRoduct' that one may Receive (in good shipping oRder) w puRchase i.e. no middle wAteRmark. Dig? There may be two forthcoming impRovement (changes) as challenges for having the visual-Acuity: a) for you to view, is low "KB's"; b) no explanation of matte and aluminum-Backing each much higher resolution MB's (signed)-until now, has yet been politely given.

Reminders:

+ click on iMaGe to enlarge; stamp black-X to exit back column of iMaGes.

+ If you wish to purchase any in my website, list: a) batch-#...
b) image # & entitlement in an e-Mail to e-Address... <apeco44rradison@gmail.com >

+ pRices vary according to one of two pRocesses availing.
Sizes are more static, oNLY 2 per iMaGe.

folks, thank you, "R" A.

[and now: sum of what I've studied and retuRned to find thRu a
view-finder, the high-counTRy coloRado-RockiEs..]
