we-People ought find our community-Americanism

as I commune more, upon what I have written of NSDU-238 in my nine-Volumes, I am aghast w the people's UN-knowns on/of the nuclear-Molecular nemesis. Herein, I find americanism for education ought not loose but increase the public sphere, but that we-People ought find our community-Americanism, and not the Conditionalism of military-Takeover and plutocracy.

Please do checkout my hard-wirk of 48-years accumulation of facts, of histories, brutality by cIAS and US-military leading the weigh-ins of a new-Rome, starting in 1955. The usages of NSDU-238 have been hypocritical, egregious, masse` murder, UN-cleanly, UN-friendly, war-Mongering w impunity, and UN-declared-Wars illegal. Period. My long times of meeting w almost all these we-People: americans in the four "video's" which do represent more than what should not have happened, but what you should know better than, I as artist, why I became a wRitoR and Philosopher as well!

I've given five decades to acknowledging "what we do not know" and as sole-Survivor of two-family surnames, I am not pleased w fellow-Boomers, nor fellow-AmERICANS w their collective heads-up-Ass. Pull that out, because you "stink".

Checkout my already published since 2004, anti-nucleaRist bloGs, as I've added due the technology improvements, what my books and video-Parallels of many others have said, have done and what the found was necessary as well as immensely. Since the US-military is the new-Rome, that means we do not have, altho we do need our Constitution, even moreso. Where is your

US-constitution, anymore, but run-over by illegal-Warmongering by oligarchs and plutocrats in executive-Chaos office, the war-Machine ought have been halted in 1966, not the eye-opening of Haight 'n Asbury.
