US-military garbage of Wars

HALT: NSDU-238, ban-theRmos– honed to be used there is a constant of wars, bombs ahoy, those are bombs coming from US-military air-force bombs-Bombing destroy anywhere w

NSDU-238 will-not-be used, altho useful because indemnity says correctly, no, nonesuch because threats make psychopathologic malady subscriptive useful as non-Halting dissatisfaction-Lies

that a war is the answer to propaganda, but go ahead always nonetheless, gestalt always is good-Wars, negligence-Accuracy where and therefore aero-Jets contaminations cannot-be-seen

wherefore, bombs cannot be seen either, since impermeable death and destruction is not Wall Street but munitions dealing and arms-Sales and bombs being built for offensive measures

to keep aggressor-Stance w d00m 'n gL00m is probability and to maintain threats of 'Bombs-Nuclear' is good probity edifice for moralism excuse-making in order to keep those bombs

being dropped upon various nations whose sincerity used for sovereignty was becoming fascist or cIAS helped them beckon soooo the immoralism is renown but honed to become
